Adlerian Group Case Consultation

Adlerian Group Case Consultation is a didactic and experiential workshop based on the theory and practice of the psychology developed by Alfred Adler. A structured group psycho-educational process will be utilized to better understand clients whether they are children, adolescents, adults, or aging. In addition, the Adlerian group case consultation model will be utilized to better understand couples, families and small groups. Emphasis will be on the practical application of Adlerian psychology in personal and professional venues and the workshop will be conducted modeling empathy, encouragement, equality, and ethics in a psycho-educational setting.
